## **My Goals**

### **WHY DO I NEED A JOB?**

Well first of all I would have to say that I do need to earn some money for my expenses, I have a budget plan and want to stick to it. Mostly I want to grow and have the experience of working in a dedicated way and learn new things and be a better person. I think being responsible and working can be fulfilling and full of growth.

### **WHAT KIND OF WORK WOULD I LIKE TO DO?**

I like working with people, so I am looking for work that has that as a large component. But, also I am really good with technology and making things with my own hands. I always make sure that the things that I do are artistic and done as well as that can be. I saw how it is to do things like that in school and am ready to use my skills and talents on the job.

### **HOW MUCH MONEY DO I NEED TO MAKE?**

This is my first job, I am still in school, and don't have to completely support myself I am happy to work at the minimum wage of \$8 an hour. I need to cover my outside expenses, my car, pocket money, college fund and the stuff like that.

I am a very collaborative worker, I like working in teams and building community. ### **QUESTIONS FOR ME**

Tell me about your school and your classes.

Why do you want this job?

Why should I hire you?

### **QUESTIONS TO ASK**

What would a typical day on this job be like?

What kind of opportunities will there be for advancement, training and learning new things in this position?

### **CHALLENGES**

I have to admit that last quarter, in my computer class, I was slacking off. I got distracted playing games and watching YouTube videos on the internet. The end of the quarter snuck up on me and I suddenly woke up and saw how bad my grade was! There seemed to be no time to recover, I felt scared and hopelessly defeated.

I wanted to give up, but, I got up my courage, took a chance and talked to my teacher, Mr. Lavendel, about it. He was impressed that I came to him, was honest about my behavior and seriously wanted to find a way to recover my grade. We mapped out a strategy for it to happen and with a lot of work on weekends, free periods and after school I got enough done to get an A- on my semester grade!
